

What is **HUNTER MITE**?

Hunter Mite is a water soluble liquid complementary feed for laying hens, designed with high content of essential oils for producing a **repellent effect against arthropods** (*Dermanyssus gallinae*, flies, and others).

Hunter Mite has a dual action mechanism: a **direct action** thanks to its aromatic components and an **indirect action** due to the metabolism of the animal's product.

HOW DOES IT WORK ON?

WHAT DOES IT CONTAIN?

- ✓ The natural extracts are diffused by animals thanks to excrement repulsing (*Dermanyssus gallinae*, flies and others).
- ✓ Hunter Mite is **safe** and **leaves no residues** in meat and eggs.

PACKAGING

Bottle of 1L

Tank of 10-25L
