

What is **EIMERFIT**?

Eimerfit is a complementary mineral feed for beef cattle designed for the **control of coccidiosis**.

Coccidiosis represents the most widespread bovine parasitic infestation which has a significant negative impact on animal's welfare. The **validity of Eimerfit** was verified proven in a **study** carried out in collaboration with the **University of Turin** on 2014, which revealed greater results using the product when the calves arrive in the fattening stalls and when there are physical or climatic conditions that contribute at the onset of the infestation.

HOW DOES IT WORK ON?

IT CONTRASTS THE
DEVELOPMENT AND THE
PROGRESS OF COCCIDIOSIS

IT INCREASES PRODUCTIVE
PERFORMANCE

IT FIGHTS AGAINST
OXIDATIVE STRESSES

WHAT DOES IT CONTAIN?

- ✓ *Yucca schidigera* extract is a coadjuvant of coccidiosis reduction

- ✓ *Vitamin E* has an anti-oxidant action

PACKAGING

Bag of 25Kg
