

What is **SHUT OUT**?

Shut Out is a powder complementary feed for poultry, designed with high content of essential oils for producing a **repellent effect against arthropods** (*Dermanyssus gallinae*, flies, and others).

Shut Out has a dual action mechanism: a **direct action** thanks to its aromatic components and an **indirect action** due to the metabolism of the animals product. **It can be used in organic farming in compliance with regulations (EC) no. 834/2007 and (EC) no. 889/2008.**

HOW DOES IT WORK ON?

WHAT DOES IT CONTAIN?

- ✓ The *natural extracts* are diffused by animals thank to excrement repulsing (*Dermanyssus gallinae*, flies, and others).
- ✓ Hunter Mite P is **safe** and leaves **no residues in meat and eggs**
