

What is **GOLD INSIDE**?

Gold Inside is a **bolus** specifically developed for the **prevention of post calving Hypocalcaemia** in dairy cows.

It is a metabolic pathology caused by a decrease of calcaemia in post calving animals, caused by a fast transfer of calcium from blood to the colostrums. Hypocalcaemia occurs within 12h before/48h after calving. A correct management of the first phases post partum avoids hypocalcaemia onset.

HOW DOES IT WORK ON?

IT REDUCES HYPOCALCAEMIA

IT PROVIDES MODULATED
ABSORPTION CALCIUM

IT BRINGS A GREATER AMOUNT
OF CALCIUM AT THE BLOOD LEVEL

IT FAVORS THE BONE
MOBILISATION IMPROVEMENT
OF CALCIUM

WHAT DOES IT CONTAIN?

- ✓ *Calcium pidolate* supplies great quantities of calcium available at intestinal level; *Calcium gluconate*, *Calcium carbonate* and *Calcium propionate* work in synergy to maintain optimal levels of blood calcium over time
- ✓ *Vitamin D3* presence promotes intestinal calcium absorption
- ✓ *Salix alba* natural extract has an anti-inflammatory action

PACKAGING

Box with 20 Boluses
of 90g each
